

# It's time to be water wise because every drop counts

## Did you know?

**Less than 1%** of all household water is actually consumed by people!  
Most of it is used for **showering, toilet flushing, laundry or outdoors use.**

### **Water Wise Wisdom**

- *Use the dishwasher with a full load. Running a full load in a water-efficient dishwasher uses less water than washing dishes by hand.*
- *Rinse vegetables in a bowl and then use the water on your garden.*
- *Divert grey water from your washing machine for immediate use on your garden (except vegetables).*
- *Try not to use your washing machine every day. Instead, sort clothes and wash bigger loads less frequently.*
- *Check your water meter monthly to monitor and understand how much water you use. This will also help locate leaks early, saving you both water and money.*
