Bureau of Meteorology

How to use this map:

- 1. Obtain the latest cyclone advice issued by the Bureau of Meteorology Tropical Cyclone Warning Centre 2. On a table, record the coordinates (the latitude and longitude in degrees and tenths of degrees) of the position of the cyclone. Note also the advice number, the date and time, the category number, speed and direction of movement of the cyclone and the maximum wind gust.
- **3.** On this map, locate the position of the cyclone centre using the numbered lines of latitude and longitude. Using a white board pen, mark this position and label it with the advice number.
- 4. As advices continue, join the marks together and track the cyclone's path.

The map's scale may be used to measure the distance of the cyclone from your locality.

Bureau of Meteorology Tropical Cyclone Advice QLD – Phone 1300 659 212 NT – Phone 1300 659 211

Cyclone advices

Tropical Cyclone Information Bulletins are issued if a tropical cyclone exists within the Queensland region but is not expected to threaten any coastal or island communities within the next 48 hours. A Cyclone Watch is issued when gales or stronger winds are expected to affect coastal or island communities within 48 hours but not within 24 hours.

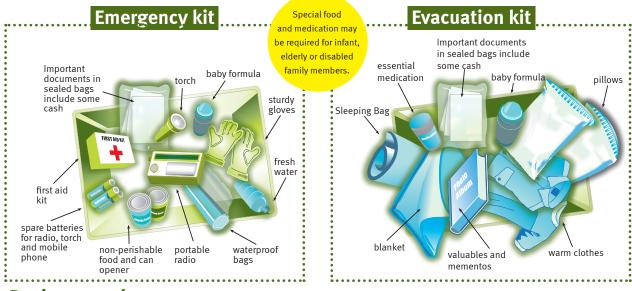

Cyclone Warning messages are issued three hourly when gales or stronger winds are expected to affect coastal or island communities within 24 hours. When a cyclone is under radar surveillance and a community is directly threatened, hourly warnings are issued.

What you should do

As a cyclone approaches

If you hear a cyclone watch or warning you should:

- **Tune in** to your local ABC radio and TV station
- Log on to the Bureau of Meteorology website for weather and warnings **b Listen out** – for the Standard Emergency Warning Signal, emergency alert
- messages sent to your telephone and community safety announcements
- **and ACT!** Warnings are urgent. Act immediately on the advice provided.
- Monitor the movement and severity of the cyclone. Track the movement on this map. Solution Check that your emergency kit is complete and easily accessible (see diagram below)
- Scheck that your neighbours are aware that a cyclone watch or warning has been issued
- Solution Clear your property of all loose items including outdoor furniture, children's toys and gardening equipment
- Secure any boats and move all vehicles and bicycles under cover
- > Fill buckets and bath with water and ensure you have sufficient water purification tablets to make the water drinkable
- > Prepare an evacuation kit (see diagram below)
- Secure windows by closing shutters or taping glass in a criss-cross fashion using strong packing tape
- Bring children and pets indoors and remain inside until further advice is given.

During a cyclone

If a cyclone is approaching and an official evacuation order has not been issued, you may decide to shelter in your home until the cyclone has passed through.

- If you decide to shelter at home you should:
- Survey Turn off all electricity, gas and water and unplug all appliances
- Keep your emergency kit close at hand
- Bring family into the strongest part of the house (usually the smallest room)
- Solution Keep listening to the radio for cyclone updates and remain indoors until advised
- Solution If the building begins to break up, immediately seek shelter under a strong table or bench or under a heavy mattress
- BEWARE THE CALM EYE OF THE CYCLONE. Do not venture outdoors during the eye of the cyclone. Stay inside until you have received official advice that it is safe to go outside.

If you must evacuate:

If an official evacuation order is issued then you and your family must leave your home immediately and seek shelter with friends or family who are further inland or on higher ground.

- Solution Turn off all electricity, gas and water, unplug all appliances and lock your doors
- Ensure all family members are wearing strong shoes and suitable clothing S Take your emergency kit and evacuation kit and commence your evacuation to accommodation with family or friends.

After a cyclone

Once you have been advised that the cyclone has passed you should:

- S Listen to your radio and remain indoors until advised
- Solution If you are told to return to your home, do so using the recommended routes only
- Do not go sightseeing
- Check on your neighbours if necessary
- So not use electrical appliances which have been wet until they are checked for safety
- Soil or purify your water until supplies are declared safe
- Stay away from damaged powerlines, fallen trees and flood water
- S If your home has become uninhabitable due to cyclone damage, contact your local council to identify where you can seek further assistance.

ABC Local Radio and the Bureau of Meteorology website (www.bom.gov.au) will keep you up to date with the latest information when a cyclone warning is in effect.
